

Stuti Bhangale

React Developer | Frontend Developer

Pune | +91 9545500248 | stutibhangale2000@gmail.com | www.linkedin.com/in/stuti-bhangale | [stuti-portfolio](#)

PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of overall experience developing responsive web applications using React.js, JavaScript (ES6+), TypeScript, Redux and REST APIs, with recent hands-on experience in Angular 17. Experienced in building reusable UI components, dynamic forms, CRUD workflows, API integrations and state-managed applications for enterprise payment and AI solutions. Skilled in translating business requirements into maintainable frontend implementations and collaborating with cross-functional teams in Agile environments.

TECHNICAL SKILLS

Frontend Technologies: React.js, JavaScript (ES6+), TypeScript, React Hooks, React Router, Redux, HTML5, CSS3, Angular, Material UI

Development & Engineering: Performance Optimization, REST API Integration, CRUD Operations, State Management, Reusable Components, Responsive UI, Form Validation, Authentication & Authorization, Error Handling, Accessibility

Tools: Git, GitHub, Jira, Figma, Power BI, SharePoint

Domain & Practices: Payments (ISO 8583), Payment Switch, RAG, Role-Based Agents, Agentic AI Workflow, Agile, Scrum, SDLC

PROFESSIONAL EXPERIENCE

Opus Technologies

Frontend Developer

AI Application | February 2026 – Present

Technologies: Angular, TypeScript, JavaScript, HTML5, CSS3, REST APIs

- Understood business requirements and translated them into user flows and Figma designs, creating UI designs aligned with functional requirements before development.
- Developed the application based on the approved designs, building responsive UI screens and integrating **30+ REST APIs** with backend services.
- Designed reusable UI components such as navigation, search, chat bubble and prompt input, reducing duplicate UI development effort by **around ~30%** across multiple screens.
- Mentored 3 interns on a Graph-based RAG module, providing technical guidance, conducting progress reviews and supporting timely feature delivery.

Delivery Excellence | May 2025 – January 2026

Technologies: Power BI, SharePoint

- Built Power BI dashboards to track delivery metrics and support monthly governance reporting, reducing manual reporting effort.
- Analyzed project metrics and status reports to monitor delivery performance, coordinating with project managers to gather and validate data for accurate delivery tracking and reporting.
- Contributed to developing presentation materials for the Delivery Excellence Manager Program, supporting knowledge sharing and program content development.

Payment Solution | Jan 2024 – Dec 2024

Technologies: React.js, JavaScript (ES6+), TypeScript, Redux, Material UI, Axios, HTML5, CSS3, REST APIs

- Developed React.js frontend features for an enterprise payment solution, building configurable forms, dynamic modules, and complex hierarchical table with parent-child relationships.

- Integrated **30+ REST API** operations using Axios to support CRUD workflows, asynchronous data handling, form validation, and error handling.
- Developed **6 reusable** UI components, including common layout elements, alert and confirmation dialogs, toast notifications, and reusable table states, improving UI consistency and reducing duplicated code **approximately 20–30%** across configuration screens.
- Applied React performance optimization practices to improve application responsiveness and minimize unnecessary rendering.
- Collaborated with business analysts, backend developers, and QA engineers to clarify requirements, resolve defects, and deliver features within Agile sprints.

Intern | June 2023 – December 2023

Technologies: React.js, TypeScript, JavaScript, Redux, REST APIs, HTML5, CSS3

- Gained hands-on experience in UI technologies, and responsive UI development while working on an internal employee meal-booking application.
- Learned to develop reusable components, manage application state, integrate REST APIs, and debug frontend issues with guidance from senior developers.
- Improved understanding of the software development lifecycle by participating in requirement discussions, development, testing, bug fixing, and collaboration with team members.

ACHIEVEMENTS

- Received the Individual Award for Dedication and Commitment at Opus Technologies.
- Awarded the Delivery Excellence Certificate for successfully completing the Delivery Excellence Program and contributing to program content and design.

EDUCATION

Bachelor of Engineering (Information Technology)

PES Modern College of Engineering | Aug 2022
