Stuti Bhangale

Frontend Developer

Pune | +91 9545500248 | stutibhangale2000@gmail.com | www.linkedin.com/in/stuti-bhangale | stuti-portfolio

PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of overall experience developing responsive web applications using React.js, JavaScript (ES6+), TypeScript, Redux and REST APIs, with recent hands-on experience in Angular 17. Experienced in building reusable UI components, dynamic forms, CRUD workflows, API integrations and state-managed applications for enterprise payment and AI solutions. Skilled in translating business requirements into maintainable frontend implementations and collaborating with cross-functional teams in Agile environments.

TECHNICAL SKILLS

Frontend Technologies: React.js, JavaScript (ES6+), TypeScript, React Hooks, React Router, Redux, HTML5, CSS3, Angular, Material UI

Development & Engineering: Performance Optimization**,** REST API Integration, CRUD Operations, State Management, Reusable Components, Responsive UI, Form Validation, Authentication & Authorization, Error Handling, Accessibility

Tools: Git, GitHub, Jira, Figma, Power BI, SharePoint

Domain & Practices: Payments (ISO 8583), Payment Switch, RAG, Role-Based Agents, Agentic AI Workflow, Agile, Scrum, SDLC

PROFESSIONAL EXPERIENCE

Opus Technologies | Tech Engineer

June 2023 – Present

- Contributed to frontend development of enterprise payment and AI applications, building responsive, maintainable user interfaces.
- Translated business requirements into maintainable frontend implementations, creating user flows and UI designs using Figma before development.
- Developed responsive interfaces, reusable components, dynamic forms and API-integrated workflows using React.js and Angular.
- Integrated REST APIs, implemented CRUD operations, managed application state and handled form validation and error scenarios.
- Collaborated with business analysts, backend developers and QA engineers to clarify requirements, resolve defects and deliver features within Agile sprints.
- Mentored 3 interns on a Graph-based RAG module, providing technical guidance and supporting timely feature delivery.

PROJECTS

Payment Solution

Technologies**:** React.js, JavaScript (ES6+), TypeScript, Redux, Material UI, Axios, HTML5, CSS3, REST APIs

- Developed React.js frontend features for an enterprise payment solution, building configurable forms, dynamic modules and complex hierarchical table with parent-child relationships.
- Integrated **30+** REST API operations using Axios to support CRUD workflows, asynchronous data handling, form validation and error handling.
- Developed **6** reusable components, including common layout elements, alert and confirmation dialogs, toast notifications and reusable table states, improving UI consistency and reducing duplicated code by approximately **20–30%** across configuration screens.
- Applied React performance optimization practices to improve application responsiveness and minimize unnecessary rendering.

AI Application

Technologies**:** Angular 17, TypeScript, JavaScript, HTML5, CSS3, REST APIs, Figma

- Translated business requirements into Figma UI designs, aligning screen layouts and interactions with functional requirements before development.
- Developed responsive Angular 17 interfaces from Figma designs and integrated **30+** REST APIs with backend services to support application functionality.
- Designed and developed **7** reusable UI components, including navigation, search, chat bubble, prompt input and modal components, reducing duplicate UI development effort by around **30%** across multiple screens.
- Used Git and GitHub for source code management, version control and tracking code changes throughout development.

Employee Meal-Booking Application

Technologies**:** React.js, TypeScript, JavaScript, Redux, REST APIs, HTML5, CSS3

- Contributed to responsive UI development for an employee meal-booking application.
- Gained hands-on experience in reusable components, application state management, REST API integration and frontend debugging.
- Participated in requirement discussions, development, testing and bug fixing as part of the software development lifecycle.

ADDITIONAL EXPERIENCE

Delivery Excellence

Technologies**:** Power BI, SharePoint

- Built Power BI dashboards to track delivery metrics and support monthly governance reporting, reducing manual reporting effort.
- Analyzed project metrics and status reports, coordinating with project managers to validate data and support accurate delivery tracking.
- Contributed to presentation materials for the Delivery Excellence Manager Program, supporting knowledge sharing and program content development.

ACHIEVEMENTS

- Received the Individual Award for Dedication and Commitment at Opus Technologies.
- Awarded the Delivery Excellence Certificate for successfully completing the Delivery Excellence Program and contributing to program content and design.

EDUCATION

Bachelor of Engineering (Information Technology)

PES Modern College of Engineering | Aug 2022
