Stuti Bhangale

Frontend Developer

Pune | +91 9545500248 | stutibhangale2000@gmail.com | www.linkedin.com/in/stuti-bhangale | stuti-portfolio

PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of overall experience developing responsive web applications using React.js, JavaScript (ES6+), TypeScript, Redux and REST APIs, with hands-on experience in Angular 17. Experienced in building reusable UI components, dynamic forms, CRUD workflows, API integrations and state-managed applications for enterprise payment and AI solutions. Skilled in translating business requirements into maintainable frontend implementations and collaborating with cross-functional teams in Agile environments.

TECHNICAL SKILLS

Frontend Technologies: React.js, JavaScript (ES6+), TypeScript, React Hooks, React Router, Redux, HTML5, CSS3, Angular 17, Material UI, Formik, Yup.

Development & Engineering: Performance Optimization**,** REST API Integration, CRUD Operations, State Management, Reusable Components, Responsive UI, Form Validation, Authentication & Authorization, Error Handling, Accessibility

Tools: Git, GitHub, Jira, Figma, Power BI, SharePoint

Domain & Practices: Payments (ISO 8583), Payment Switch, RAG, Role-Based Agents, Agentic AI Workflow, Agile, Scrum, SDLC

PROFESSIONAL EXPERIENCE

Opus Technologies | Tech Engineer

January 2024 – Present

- Develop responsive and maintainable frontend interfaces for enterprise payment and AI applications using React.js, Angular, JavaScript and TypeScript.
- Translate business requirements into frontend solutions, creating user flows and UI designs in Figma before implementing application features.
- Develop reusable UI components and dynamic forms, implemented application state management with Redux, and integrated REST APIs to support CRUD operations and implemented error handling.
- Apply frontend performance optimization techniques to improve application responsiveness, optimize list rendering and minimize unnecessary re-renders.
- Collaborate with business analysts, backend developers and QA engineers to clarify requirements, troubleshoot defects and deliver features within Agile/Scrum sprints.
- Maintain code quality and managed source code using Git and GitHub.
- Mentored 3 interns on a Graph RAG module through technical guidance, code reviews and development support.

Opus Technologies | Intern

June 2023 – December 2023

- Gained hands-on experience with React.js by implementing frontend development tasks and applying component-based development concepts.
- Worked with Redux for application state management and integrated REST APIs to perform CRUD operations on application data.
- Built and refined frontend functionality through practical tasks, including reusable UI components and debugging.
- Contributed to the frontend development of an employee meal-booking application, collaborating with team members to implement features, test functionality and resolve issues.

PROJECTS

Payment Solution

Technologies**:** React.js, JavaScript (ES6+), TypeScript, Redux, Material UI, Axios, HTML5, CSS3, REST APIs

- Developed React.js frontend features for an enterprise payment solution supporting ISO 8583 transaction mapping and message-processing workflows.
- Built configurable forms using Formik and Yup for form handling and field-level validation, along with hierarchical data tables featuring parent-child relationships.
- Integrated **30+ REST API operations** using Axios to support CRUD workflows, asynchronous data handling, form validation and error management.
- Developed **6 reusable UI components**, including layout wrappers, alert and confirmation dialogs, toast notifications, configuration panels and reusable empty-table states, reducing duplicate UI development by approximately **25%.**
- Managed application state with Redux and applied React performance optimization techniques to minimize unnecessary re-renders.

AI Application

Technologies**:** Angular 17, TypeScript, JavaScript, HTML5, CSS3, REST APIs, Figma

- Translated business requirements into Figma UI designs, defining screen layouts, user flows and interactions before frontend development.
- Developed **15+ responsive screens** using Angular 17 and TypeScript, converting approved UI designs into functional application interfaces.
- Integrated **30+ REST APIs** for AI Chat, Retrieval-Augmented Generation (RAG), Agentic AI and Role-Based Agents modules, handling asynchronous responses, loading states, error scenarios and frontend data flows.
- Designed and developed **7 reusable Angular components**, including navigation, search bars, prompt inputs, chat bubbles and dialogs, improving UI consistency and reducing duplicate UI development by approximately **30%.**
- Implemented form validation and interactive UI workflows to support AI-powered application features.
- Used Git and GitHub for source control and version management.

Employee Meal-Booking Application

Technologies**:** React.js, TypeScript, JavaScript, Redux, REST APIs, HTML5, CSS3

- Developed responsive UI components and frontend features to support employee meal-booking workflows.
- Integrated REST APIs to support CRUD operations and interactive application workflows.
- Contributed to application state management, frontend debugging and testing to improve functionality and user experience.

ADDITIONAL EXPERIENCE

Delivery Excellence

Technologies**:** Power BI, SharePoint

- Built Power BI dashboards to track delivery metrics and support monthly governance reporting, reducing manual reporting effort.
- Analyzed project metrics and status reports, coordinating with project managers to validate data and support accurate delivery tracking.
- Contributed to presentation materials for the Delivery Excellence Manager Program, supporting knowledge sharing and program content development.

ACHIEVEMENTS

- Received the **Individual Award for Dedication and Commitment** at Opus Technologies.
- Awarded the **Delivery Excellence Certificate** for successfully completing the Delivery Excellence Program and contributing to program content and design.

EDUCATION

Bachelor of Engineering in Information Technology

PES Modern College of Engineering | Aug 2022
